PROFILE

Front-end developer who works across user research, product and code. I build production software in TypeScript and React, talk to users regularly, and help teams decide what to build next. Most of my recent work is SharePoint / Microsoft 365 product development and custom React web parts for enterprise clients.

EXPERIENCE

CPH Cloud Company

Concept & front-end developer · 2023–present

- Custom React web parts and SharePoint consulting for clients including Novo Nordisk, AO Johansen and Xellia.
- Built and maintained internal SharePoint web parts for Novo Nordisk Global Medical Affairs, including a therapy-area navigation matrix editable by non-developers.
- Broader Microsoft 365 and Azure work: tenant administration, permissions, and practical work outside the codebase.

BMF Systems

Product developer · SharePoint / M365

- Sole developer on a modular ISO management system installed in customers' own SharePoint tenants.
- Owned incident handling, risk assessment, supplier evaluation, document workflows, and related product modules.
- Worked as product developer and support: customer feedback, prioritisation with stakeholders, and implementation.

FaunaPhotonics

Software developer · 2021–2023

- Frontend developer on the customer data portal; maintained and extended the IoT/data-facing product surface.
- Bachelor thesis (2023): user interviews and end-to-end Figma prototype for the insect data portal rebuild.
