Albert Sylvester

Concept & front-end developer · Copenhagen

albertsylvester@outlook.dk · linkedin.com/in/albert-sylvester-l · www.albertsylvester.dk

PROFILE

Front-end developer who works across user research, product and code. I build production software in TypeScript and React, talk to users regularly, and help teams decide what to build next. Currently freelancing, mainly on MJS. Most of my recent work is SharePoint / Microsoft 365 product development and custom React web parts for enterprise clients.

EXPERIENCE

Sylvester Works (freelance)

Freelance developer & support · 2026–present

- Customer support and product development on MJS (Merrild Jensen Systems), one of the two products that came out of BMF Systems.
- Fixes and maintenance on Signum Life Science's custom WordPress theme.

CPH Cloud Company

Concept & front-end developer · 2023–2026

- Custom React web parts and SharePoint consulting for clients including Novo Nordisk, AO Johansen and Xellia.
- Built and maintained internal SharePoint web parts for Novo Nordisk Global Medical Affairs, including a therapy-area navigation matrix editable by non-developers.
- Broader Microsoft 365 and Azure work: tenant administration, permissions, and practical work outside the codebase.

BMF Systems

Product developer · SharePoint / M365

- Sole developer on a modular ISO management system installed in customers' own SharePoint tenants.
- Owned incident handling, risk assessment, supplier evaluation, document workflows, and related product modules.
- Worked as product developer and support: customer feedback, prioritisation with stakeholders, and implementation.

FaunaPhotonics

Software developer · 2021–2023

- Frontend developer on the customer data portal; maintained and extended the IoT/data-facing product surface.
- Bachelor thesis (2023): user interviews and end-to-end Figma prototype for the insect data portal rebuild.
